

(4thth March 2014)

Hi Chris,

I hope your well and keeping busy.

We took Molly Coddle out for 3 1/2 months last summer and had loads of complements on the paint work and finish it really does look great, the gunnels took a few scrapes so now i'm looking to give them a coat of the Raddle Black you used could you please tell me what make, code etc it was and where i can get it from, also do you recommend any UV protective wax of any kind and where can i get that if there is any?

I hope you can help with this and thanks if you can.

Cheers

Pete
